

NEWS FLASH: FUNDING OPPORTUNITIES!

Do you have a tourism-related project that could do with some funding support?

If your proposed project:

- Has an **international focus** and will lead to new **high-value products**...
- Or will lead to **improved processes or operations** to drive efficient growth...
- Or will generate more value from assets by **reducing seasonality**...
- Or **drive regional growth** in an area of New Zealand where job growth is particularly important and where there is strong potential for a more developed tourism sector.

If any of the above apply, then there may be government funding support to help you realise your project. Please get in touch with our team for more information.

The NZ Tourism Growth Partnership has a number of funding options available, including matching grants and funding for feasibility assessment of proposed ventures, but you must apply before 12th October. Check out the TGP website for eligibility and assessment criteria and further details.

Impact Consulting and Accounting can help you:

Our experienced team focuses on working with you to grow your dream into a reality. If you have a basic idea for a proposed project, we can help you to assess the costs, potential market and risks of your business proposition. Feasibility investigations are one of our specialities and the Tourism Growth Partnership has a feasibility fund for which you may be eligible. Get in touch for more information.
